OBJECTIVE

Motivated Software Engineering student aiming to become a software engineer, eager to secure an internship at Google. Looking forward to applying programming skills, gaining hands-on experience, and contributing to solving community challenges

EDUCATION

Addis Ababa University || AAiT

Sep 2019 – July 2025

Bachelor of Science in Software Engineering

Relevant Coursework: Algorithm Design And Data Structures, Java, Python, Operating Systems, Computer Architecture, Object-Oriented Programming, Relational Databases,

A2SV | Africa to Silicon Valley

NOV 2023 - present

Competitive Programming

- I am one of the members in the Group54 A2SV group.

SKILLS

Advanced - Python, GO, Data Structures and Algorithm, Git, Github, JavaScript, React

Intermediate - Backend Development, Unix/Linux, MySQL, PostgreSQL, Nestjs, Mobile

Beginner - NextJS, Django, Application Development

EXPERIENCE

[PSYANN Graphics](#)

oct 2022– oct 2023

Website Developer/WordPress Developer

- ❖ PSYANN Graphics needed to develop a scalable and user-friendly website to enhance its online presence. As the primary developer, I was tasked with designing and implementing a website using the WordPress framework, leveraging themes and plugins to ensure scalability and functionality. I led the development process, selecting appropriate themes and plugins to meet the project requirements. I collaborated with a team to customize and integrate features, ensuring the website was responsive and optimized for performance. Successfully launched the website within the deadline, significantly improving the company's online visibility. Within one year, contributed to the development of over three major projects, enhancing the team's overall productivity and project delivery.

[CDHI](#)

oct 2023– June 2024

Website Developer/Software Developer

- CDHI required a robust website and software solutions to support its expanding digital services. As a Website and Software Developer, my role involved creating a website and developing software tools to support CDHI's digital transformation. I utilized my expertise in web and software development to build a user-friendly website, implementing modern design practices and ensuring cross-platform

compatibility. I also developed software tools that streamlined internal processes. Successfully delivered a fully functional website and software tools that enhanced CDHI's digital operations, contributing to increased user engagement and operational efficiency.

OPEN SOURCE PROJECTS

E-commerce Website

- Developed using- **MERN Stack**

Home Rental System

- **Led Team** and Increased accessibility to approximately **70% of the Addis Ababa population** by implementing a system controlled by multiple admins and introducing a report functionality
- Developed using-**Bootstrap CSS, Nestjs, MySQL**

Insurance-System-APP

- A mobile Application that helps insurance system is easily applicable and user friendly. Conducted **widget testing and integration testing**
- Developed using- **Flutter ,Node js, MySQL**

ACHIEVEMENTS AND OTHER ACTIVITIES

- Earned **Regional Award** for achieving the highest scores in Grade 10 National Exam: **4.0/4.0**.
- Attained a remarkable position in **the top 0.02%** of scorers in the National University Entrance
- Demonstrated leadership skills by successfully **leading teams of 5-10 members** in 4 final school projects.
